REVIEW

HISTORY

Meets Specifications

Awesome !!
Great first work, keep it up :)

Analysis

- **The SQL query used to extract the data is included.**
- **The query runs without error and pulls the intended data.**

Great work adding the SQL queries used to extract data for Delhi and comparing that to global tempertaure.

Moving averages are calculated to be used in the line chart.

Good job calculating the moving average and adding the used method.

- **A line chart is included in the submission.**

- The chart and its axes have titles, and there's a clear legend (if applicable).

The line chart included in this report looks amazing with clear chart and axes titles

- The student includes four observations about their provided data visualization.
- The four observations are accurate.

Excellent work adding your observations, they are clear and accurate.
